

Smart cities are here. Kicking and screaming is not the way to welcome them.

The point of the smart city concept is to improve quality of life for residents. That's why it's smart to plan and build with Relay. The sensor technology fits invisibly in waste receptacles on every corner, measuring a range of data at the street level — from fill level, weight and rummaging to CO₂ emissions, noise pollution and foot traffic. Actionable data you can use to improve air quality, noise levels, rodent abatement, health issues and, yes, quality of life in every zip code. Measuring success is a challenge. Relay is a powerful solution and competitive edge.
